Polish

Experience

○ 2019 - Present
TechStack
Senoir Devops Engineer

- Refactoring of Infrastructure as Code (IaC)
- Led efforts in optimizing AWS costs, leading to a significant reduction of over 40%.
- Performed fine-tuning of systems to enhance overall performance.
- Oversaw the organized rollout of new software, feature enhancements, and bug fixes.
- Maintained close collaboration with development and QA teams to address application issues, actively participating in the software development life cycle (SDLC) process.
- Executed the smooth transition of applications from ECS/EC2 to Kubernetes.
- Generated continuous enhancements and executed the integration of solutions into the existing infrastructure, tools, and workflows.

○ 2018 - 2019
Global Virtual Opportunities
DevOps/SysAdmin

- Executed remote engineering tasks for DataCenter operations, ensuring efficient and reliable performance.
- Proficiently administered DataCenters, overseeing critical aspects of infrastructure management.
- Undertook system administration responsibilities, maintaining the stability and functionality of various systems.
- Managed database clusters, optimizing their performance and availability for seamless operations.
- Implemented monitoring systems to track performance metrics and ensure proactive issue resolution.
- Led Continuous Integration and Continuous Deployment (CI/CD) practices to streamline software development pipelines.
- Proficiently established and managed clusters, contributing to robust and scalable system architectures.

Team Player

2017 - 2018
NIXSOLUTIONS
SysAdmin/DevOps

- Orchestrated the administration of servers encompassing critical functions such as Email, Web hosting, and Data management.
- Spearheaded the implementation of comprehensive Anti-Virus and Anti-Spam protocols, bolstering the company's security posture.
- Directed the automation of web hosting procedures, optimizing operational efficiency and streamlining client interactions.
- Offered expert oversight through Security Audits and Consultations, delivering invaluable insights into network, server, and service fortification.
- Ensured round-the-clock technical assistance by providing unwavering 24×7 support, effectively mitigating downtime and ensuring seamless operations.
- Content and code delivery

2014-2016
Ukrnames
System Administrator

- Managed cPanel hosting services, ensuring efficient website and application deployment.
- Handled domain name registration, assisting clients in establishing their online presence.
- Set up and supported dedicated servers, tailoring solutions to client needs.
- Provided responsive customer support, addressing inquiries and concerns.
- Administered OpenVZ/KVM VPS environments, optimizing resource utilization for clients.
- Administered monitoring and troubleshooting monitoring alerts

Skills

Cloud Platforms/Providers

- Amazon Web Services (AWS)
- Azure
- RackSpace
- Digital Ocean

Containerization and Orchestration:

- Kubernetes
- Kustomize
- Helm
- Docker
- Nomad
- Docker Compose
- Docker swarm

Automation and Configuration Management Tools:

- Terraform/Terragrunt
- Ansible
- Paker
- Chef
- Kops

Monitoring/Logging/Alerting

- Prometheus
- Grafana
- Loki
- Alertmanager
- Zabbix
- Nagios
- DataDog
- ELK Stack (Elasticsearch, Logstash, Kibana)

CI/CD

- Jenkins
- Github Actions
- Codepipeline
- Tiamcity
- GitLab CI/CD

GitOps

- ArgoCD
- FluxCD

Databases and Data Stores:

- Mysql
- Postgresql
- TImestreamDB
- influxdb
- MongoDB
- Aurora
- Redis
- Xcache
- Memcached

Programming Languages

- Python
- Bash

Certificates

In Progress

- Deep dive python
- Aws certification
- Kubernetes certification
- Terrafrom certification
- GoLang
